

Sanjay Mudumby

☎ +91 9492764088 — ✉ sanjay.mudumby@gmail.com — [in mudumby-sanjay](#) — [Sanjay-glitch-dotcom](#)

Profile

B.Tech AI student (Anurag University, 2027) with internship experience in Python development, data preprocessing, and supervised ML. Delivered 4+ full-stack projects covering REST APIs, JWT auth, and cloud deployment. Seeking **Software Engineering Intern** or **ML/AI Intern** roles.

Education

Anurag University — B.Tech in Artificial Intelligence CGPA: 7.21 / 10 2023–2027
Hyderabad

Indrani Junior College — Intermediate MPC 74.5% 2021–2023
Hyderabad

Experience

Python Development Intern **Cognifyz Technologies**
Remote *Month – Month 2025*

- Developed Python applications (calculator, validators, games) and implemented file processing with word-frequency analysis.
- Built automation scripts and applied web scraping (BeautifulSoup) and data visualization (Matplotlib).

AI-ML Virtual Intern **AICTE + Google for Developers**
Remote *Oct – Dec 2024*

- Completed 10-week program covering ML fundamentals, model training & evaluation, and deployment on Google Cloud Platform (GCP); documented metrics across 5+ experiments.

Projects

Smart Campus Issue Reporting System [🌐 Live](#) [🔗 Repo](#)
Tech: Java, Spring Boot, MySQL, JWT, REST APIs, Vercel

- Full-stack app with JWT-based RBAC (3 roles), department-wise dashboards, image uploads, email notifications; deployed on Vercel — reduced manual effort 40%.
- Designed 8+ table MySQL schema; paginated REST endpoints tested via Postman.

Anonymous Group Debate Platform [🔗 Repo](#)
Tech: Node.js, Express.js, MongoDB, Socket.io, Railway

- Real-time discussion platform with identity-concealment logic & admin moderation; supports 50+ concurrent users; backend deployed on Railway with 99% uptime during testing.

vSplit — Smart Bill Splitter (UPI-Based) [🌐 Live](#) [🔗 Repo](#)
Tech: HTML, CSS, JavaScript, Firebase, Docker

- AI-powered bill-splitting app with real-time Firebase sync & UPI CRUD logic; containerised locally with Docker for dev-prod parity; handles multiple concurrent users.

Personal Portfolio Website [🌐 Live](#) [🔗 Repo](#)
Tech: HTML5, CSS3, JavaScript, GitHub Pages

- Fully responsive portfolio centralising all project showcases; improved recruiter reach and online visibility.

Technical Skills

Full Stack Python, JavaScript, Java, C — Node.js, Express.js, Spring Boot, Angular — MySQL, MongoDB, Firebase
REST APIs, CRUD, JWT Auth, RBAC, Real-time Systems — Git, GitHub, Docker, Vercel, Railway, Postman

AI / ML NumPy, Pandas, Scikit-learn, Matplotlib — Data Preprocessing, Feature Engineering, Supervised Learning
Model Training & Evaluation, GCP — *Exploring: TensorFlow, NLP fundamentals, MLOps*

Certifications

Cryptography in Blockchain — C-DAC / MeitY, Feb 2026 Data Visualization with Python — IBM, Mar 2025
Python for Data Science — Infosys Springboard, Mar 2025 Design & Analysis of Algorithms — Udemy, Jan 2025
Web Dev Stack — Infosys Springboard (HTML5, CSS3, JS, Node.js); Simplilearn (Angular, MongoDB, Express.js)

Positions, Achievements & Activities

- **Joint Secretary**, Neural Nexus Club (2025–Present) — coordinated AI/ML workshops & guest sessions for 100+ members; **Treasurer**, Tech Amuse Club (2025–Present).
- Solved 100+ problems on LeetCode / HackerRank; delivered 4+ deployed projects (Vercel, Railway); participated in IEEE CIS “Let us ‘C’ Compilers Compete” (Jul 2024).
- *Soft skills:* Problem-solving — Team Collaboration — Communication — Quick Adaptability — Continuous Learning
