

Sanjay Mudumby

+91 9492764088 — sanjay.mudumby@gmail.com — [mudumby-sanjay](https://mudumby-sanjay.in) — Sanjay-glitch-dotcom

Profile

B.Tech AI student (Anurag University, 2027) with internship experience in Python development, data preprocessing, and supervised ML. Delivered 5+ full-stack projects covering REST APIs, JWT auth, NLP, and cloud deployment. Seeking **Software Engineering Intern** or **ML/AI Intern** roles.

Education

Anurag University — B.Tech in Artificial Intelligence CGPA: 7.21 / 10 2023–2027
Hyderabad

Indrani Junior College — Intermediate MPC 74.5% 2021–2023
Hyderabad

Experience

Virtual Internship Program **ServiceNow (via SmartBridge)**
Remote 2026

- Completed virtual internship covering ServiceNow platform fundamentals, IT Service Management (ITSM), and workflow automation.

Python Development Intern **Cognifyz Technologies**
Remote 2025

- Developed Python applications and built automation scripts; applied web scraping (BeautifulSoup) and data visualization (Matplotlib).

AI-ML Virtual Intern **AICTE + Google for Developers**
Remote Oct – Dec 2024

- Completed 10-week program on ML fundamentals, model training & evaluation, and deployment on GCP; documented metrics across 5+ experiments.

Projects

AI Resume Parser & Candidate Ranking System [Live](#) [Repo](#)
Tech: Django, Python, Scikit-learn, NLP, PostgreSQL, Render Mini Project — Venura Tech Internship

- Django-based web app that automates resume screening using ML and NLP; extracts candidate info, predicts job categories, ranks candidates by skill match, and provides recruiter analytics.
- Deployed on Render with PostgreSQL integration; end-to-end pipeline from upload to ranked shortlist.

Smart Campus Issue Reporting System [Live](#) [Repo](#)
Tech: Java, Spring Boot, MySQL, JWT, REST APIs, Vercel

- Full-stack app with JWT-based RBAC (3 roles), department dashboards, image uploads, email notifications; deployed on Vercel — reduced manual effort 40%.
- Designed 8+ table MySQL schema; paginated REST endpoints tested via Postman.

Anonymous Group Debate Platform [Repo](#)
Tech: Node.js, Express.js, MongoDB, Socket.io, Railway

- Real-time discussion platform with identity-concealment & admin moderation; supports 50+ concurrent users; 99% uptime during testing.

vSplit — Smart Bill Splitter (UPI-Based) [Live](#) [Repo](#)
Tech: HTML, CSS, JavaScript, Firebase, Docker

- AI-powered bill-splitting app with real-time Firebase sync & UPI CRUD logic; containerised with Docker for dev-prod parity.

Technical Skills

Full Stack Python, JavaScript, Java, C — Django, Node.js, Express.js, Spring Boot, Angular
MySQL, MongoDB, Firebase, PostgreSQL — REST APIs, JWT Auth, RBAC, Real-time Systems
Git, GitHub, Docker, Vercel, Railway, Render, Postman, GCP

AI / ML NumPy, Pandas, Scikit-learn, Matplotlib — Data Preprocessing, Feature Engineering, Supervised Learning, NLP
Model Training & Evaluation — Exploring: TensorFlow, MLOps

Certifications

Anthropic Claude 101 — Anthropic, 2026 Cryptography in Blockchain — C-DAC / MeitY, Feb 2026
Data Visualization with Python — IBM, Mar 2025 Python for Data Science — Infosys Springboard, Mar 2025
Design & Analysis of Algorithms — Udemy, Jan 2025 ServiceNow Virtual Internship — SmartBridge, 2026
Web Dev Stack — Infosys Springboard (HTML5, CSS3, JS, Node.js); Simplilearn (Angular, MongoDB, Express.js)

Positions, Achievements & Activities

- Joint Secretary**, Neural Nexus Club (2025–Present) — coordinated AI/ML workshops & guest sessions for 100+ members; **Treasurer**, Tech Amuse Club (2025–Present).
- Solved 100+ problems on LeetCode / HackerRank; delivered 5+ deployed projects (Vercel, Railway, Render); participated in IEEE CIS “Let us ‘C’ Compilers Compete” (Jul 2024).
- Soft skills*: Problem-solving — Team Collaboration — Communication — Quick Adaptability — Continuous Learning
